## Update Kaltura Capture to New Version (MacOS)

Langara College has recently migrated to Kaltura Cloud.

If you use Kaltura Capture, there are a few steps you'll need to take to make sure that Capture continues to work after the migration.

To start with a clean slate, you'll need to uninstall the old version of Kaltura Capture and then reinstall the new version. Don't worry; all your saved videos will remain on your hard drive.

1. In MacOS, Open Finder, then click on Applications.

- 2. Navigate down the list of applications to find Kaltura Capture.
- 3. Hold the keyboard Control Key, click on Kaltura Capture and choose "Move to Trash".

< > Applications
