NAME:	

## LANGARA COLLEGE

Philosophy 2201: Epistemology

Quiz #5

TIME: 10 minutes

January 31, 2024		
	At the start of class, <b>one</b> of the following questions will be selected at random for students to answer.	
	(These questions are based on Martin Chapter 4: "Internalism, externalism and justification".)	
1.	Summarise the causal theory of knowledge, as presented by Martin, and show that it delivers the correct answer in the case of Max and the ducks on the lake.	
2.	Explain why the causal theory seems to entail that we have no knowledge of mathematical truths, or of future events.	
3.	Describe the fake barns case, and explain why it has led philosophers away from the causal theory and toward reliabilism.
