LANGARA COLLEGE

Philosophy 2201: Epistemology

Quiz #5 (really)

TIME: 10 minutes

February 7, 2024

At the start of class, **one** of the following questions will be selected at random for students to answer.

(These questions are based on Martin Chapter 5: "Foundationalism and coherentism".)

- 1. Summarise the epistemic regress argument for foundationalism.
- 2. Summarise 'modest foundationalism', explaining how it differs from the older foundationalism of Descartes. Also give one example of a type of belief that is foundational, according to modest foundationalists.

3.	Suppose a person's beliefs are generally justified. Describe what it is that <i>makes</i> these beliefs
	justified, according to coherentism. Also summarize the argument against coherentism that is
	based on the case of Erica showing up unexpectedly on Monday.
