## LANGARA COLLEGE

Philosophy 2201: Epistemology

**Quiz #10** 

TIME: 10 minutes

March 20, 2024

At the start of class, **one** of the following questions will be selected at random for students to answer.

[For this quiz you should read Martin Chapter 9, and iweb text #32 by Linda Alcoff]

- 1. State the difference between *normative* and *descriptive* epistemology, using Martin's example of the Quinean epistemologist Dr. Szorpe.
- 2. Thomas Kuhn claims that scientific thinking is regulated by paradigms. Summarise the reasoning, as described by Martin, that leads from Kuhn's view of paradigms to the claim that knowledge is a social construct: "...there is no such thing as objective truth. It all depends on what group you belong to."

| 3. | Alcoff states that, "feminist philosophy continues to be regularly derided in the profession as inappropriately political in setting its philosophical goals". How does Alcoff defend feminist epistemology against this criticism? |  |  |  |
