NAME:		

LANGARA COLLEGE

Philosophy 2201: Epistemology

Quiz #11 (Optional)

TIME: 10 minutes

April 9-12, 2024

Drop by my office and, **one** of the following questions will be selected at random for you to answer.

[For this quiz you should read iweb text #34 by Lorraine Code]

- 1. In Code's essay, she refers to empirical research that "seems to suggest that the brains of men and women are not identical, but specialized and designed to perform in somewhat different ways." Summarise her view of (and response to) this research.
- 2. Code uses a claim in Thomas Kuhn's *Structure of Scientific Revolutions* to support her position. Summarise this claim of Kuhn's, that she finds congenial.

3.	Code points to the fact that, "in general men have been in control of determining what is labeled" as a potential barrier for women attaining knowledge. Explain why Code thinks such a barrier might exist, but also give her reason for doubting its importance.
