

Average Time Needed for Your Courses

Calculate: Your Total Hours for Each Course:

For Every Class you have about 4 Hours of Lectures each Week

For Every **Hour of Lecture** you need to **Study at Least for Two Hours** (and this is the bare minimum...):

- Lecture in class Time: 4 Hours a Week
- Study & Prep Time: $4 \times 2 = 8$ Hours a Week
- **Total Commitment to a Course** (min.) = $4 + 8 = \underline{12}$
Hours a Week

1 Course = $1 \times 12 = 12$ hours week

Like a Part-Time Job.

2 Courses = $2 \times 12 = 24$ hours a week

Not exactly a Full-Time Job, but busy; even Part-Time Work in your spare time may prove demanding.

3 Courses = $3 \times 12 = 36$ hours a week

Like a Full-Time Job. Extra work not recommended as this may overwhelm your available time.

4 Courses = $4 \times 12 = 48$ hours a week

Busier than a Full-Time Job,

5 Courses = $5 \times 12 = 60$ hours a week

Similar to a Stock Broker Hours; almost like 2 jobs per week.

Part-Time Student: 1-2 Courses

Full-Time Student: 3-5 Courses
